DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 5-10, drawn to a method for detecting a fault, classified in class 374, subclass 45.
- II. Claim 2, drawn to drawn to a method for detecting a fault, classified in class 374, subclass 45.
- III. Claim 4, drawn to a method for detecting a fault, classified in class 374, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions in that the Invention I includes a step of determining of a clutch control, not required by Invention II, while invention II is concerned with a jumper fault.

Inventions III and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions in that the Invention I includes a step of determining of a clutch control, not required by Invention II, while invention III is concerned with confirming the temperature signal of engine coolant, not required by Invention I.

Art Unit: 2855

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions in that the Invention III includes a step of confirming the temperature signal of engine coolant, not required by Invention II.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and/or examination burden if restriction were not required because at least the following reason(s) apply:

.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after

Art Unit: 2855

the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.

Claims 1-10:

A) All steps and all sub-steps should be appropriately renumbered as, for example, follows:

in claim 1: "S1" should be replaced with – a)—,
"S2" should be replaced with –b)— and the clause "the Step S2 comprising the sub-steps of" in line 9 should be replaced with –wherein the step b) comprising the sub-steps of-- . (Please see US 7722246, col. 9, lines 61-67 and entire col. 10 for reference)

B) Abbreviation, i.e., RPM, should be explained in the claims and the specification at the first occurrence.

C) All parentheses should be deleted from the claim language,

D) All claims should start with --Claim 1--, --Claim 2--, or --Claim 3--, etc.
